

Jonathan Clark

Software Developer

Strong back-end Software Developer with 12+ years of management and customer satisfaction experience in the service industry. Proficient in using a wide variety of tools to provide efficient, cost effective solutions to boost productivity and overall organizational efficiency. Merging full-stack and leadership experience to collaborate and deliver software solutions.

Development Projects

Happy Hour Capstone Project

Group developed full-stack web application created to connect users with local businesses and their happy hour offers. This application contains functionality for both consumer and business user profiles. Businesses are populated on a map with information about the business populated dynamically from a MySQL database. This project was constructed using Java, Spring, Thymeleaf, MySQL, and Maven.

Used Computer Parts eCommerce Site

Full-stack web application centered on users posting used computer parts for sale. This project was built with consumer interaction in mind, boasting messaging functionality between users as well as CRUD functionality for creating and editing posts. The application was constructed using Data Access Objects, MySQL, JSP and Java Servlets on a Tomcat server with Maven handling dependencies.

Contacts Management CLI

Command Line Interface written solely in Java for the purpose of managing a list of contacts and phone numbers. This Paired Programming project explores concepts of *Menu Driven List Manipulation* as well as using *File I/O* to manage data from sources existing outside of the program. What makes this project especially unique is its ability to validate user input to ensure a smooth, concise user experience.

Professional Experience

Tycoon Flats - San Antonio, TX

FOH Manager, Bar Manager / Feb 2017 - Present

- Training and developing 5-10 Crew Members, 3-5 Assistant Managers, and Management trainees per year
